DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on February 09, 2004 has been entered.

The pre-amendment filed on 02/09/04 has been entered. Accordingly, claims 57-67 have been added. Claims 1, 4-22, 31-33, 45-47, and 51-67 are pending. Application is in condition for allowance.

Allowable Subject Matter

2. Claims 1, 4-22, 31-33, 45-47 and 51-67 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitation of the dependent claims, in such manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims 1, 7, 9, 53 and 55. Claims 1, 7, and 9 recite in part "...a support member for supporting the spacer outside an electron-emitting region that is defined between a region of said first substrate wherein said electron-emitting devices are located, and a region of said second substrate that is irradiated by said electrons..."

Art Unit: 2875

The support structure in conjunction with the structure of an electron beam apparatus was not found in the prior art of record. Independent claim 57 recites in part :.....a spacer sandwiched directly or indirectly between the first and second substrates, and having a structure withstanding an atmospheric pressure, wherein the spacer is provided with a first film disposed on a plane of a spacer in opposition to either the first substrate or the electrode, and a second film which covers the first film so that the second film is disposed between the first film and either the first substrate or the electrode opposed to the first film, the first film has a smaller sheet resistance than that of the second film, and the first and second films contain a same metal element and have different compositions."

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
